MEMORANDUM

TO: The Boston Redevelopment Authority
FROM: Edward J. Logue, Development Administrator
RE: Interim Arrangements for Survey Program

The Survey Program undertaken during the Summer has provided us with essential data required for all 10 GNRP Areas. The concentration of manpower in the crash program during the summer enabled us to obtain information basic to our urban renewal planning progress. Survey activity will be required during the entire planning period, although its future scope will be much less than that carried on this past summer.

Up-to-date land use data, exterior building conditions, and other detailed information on all parcels within the GNRP Areas have been collected and put into tabular form. This involved approximately 50,000 structures and/or parcels of land.

More detailed data were obtained in the Washington-Park and Seaver-Townsend Project Area and Charlestown, with interior building condition surveys as well as interviews of the occupants of the structures. Approximately 4,700 structures were surveyed.

In addition to the above work, a photographic record of all 10 GNRP's was begun; base maps were drawn from assessors' plates; land use and exterior building conditions have been coded and mapped for all 10 GNRP Areas and Rehabilitation Reconnaissance and Rehabilitation Feasibility studies were made for Washington-Park, Seaver-Townsend Area.

The information collected to date is an essential part of:

1. The preparation of renewal plans for all 10 GNRP's Areas.
2. The determination of project eligibility for Washington Park and Charlestown under existing laws and regulations.
3. Estimating relocation requirements for Washington Park and Charlestown.

9/20/61

4. Completion and expansion of the photographic documentation of the 10 GNRP areas.
5. Preparation of graphical presentation of survey data as required to assist in making planning determinations, and as required by the Urban Renewal Manual.

A number of capable summer survey personnel is available for re-appointment to carry out some of the above work. We should make full use of the experience which they gained during the summer.

Approval is requested for the following:

Sixty-calendar-day reappointment of available and qualified summer personnel to be effective and retroactive to September 18, 1961, to avoid any loss of time and pay to the temporary personnel and to carry on effectively the survey work program without interruption. The list of personnel recommended is attached hereto.

The estimated cost of surveys for this period for personnel services and related expenditures is \$45,000. It is a 100% project cost item of expenditure and funds are available from existing GNRP Budgets.

A report will be submitted to the Authority at the earliest possible date covering the detailed accomplishments of the summer survey program, and a proposal for the future survey program complete with personnel requirements and recommended positions.
